## PROFESSIONAL ACHIEVEMENTS

2021 result	Replaced 6 modem connections with a new wireless connection using MikroTik technology. This reduced LAN downtime at remote offices from 18 hours per month to 0.
2020 result	A contract was concluded with a service center for the repair of office equipment. Do-it-yourself repairs in the office are excluded. Downtime for repairing office equipment has been reduced from 3 weeks to 1-2 days. The system administrator released 7 working hours per month.
2020 result	Installed 12 IP phones in the company. Reduced cell and landline costs by \$139 per month.
2020 result	More than 100 remote connections of users from home are organized. Minimal cases of infection of employees with the COVID-19 virus. Employees of the company fully worked from home for 19 months.
2019 result	The local network is connected to the headquarters of the parent company in the capital. MikroTik hardware is used.. Corporate policies (Domain, Active Directory, scripts) and services by the parent company (network storage resources, applications using private access) were applied for 150 users.
2016 result	Implemented an electronic document management system (EDMS) for 70 users. The time for preparation, search and approval of documents was reduced by 65%.
2011 result	SHDSL modem technology was replaced in 5 remote offices of the company (Sigrand instead of ZyXEL). Network throughput in remote offices increased from 1.6 Mb / s. up to 12 Mb/s
2010 result	Designed and installed a network for 36 computers in 5 classrooms for the training center. I connected one server and the Internet in the local network. Installed applications for staff training. Continued to administer this network for 2 years. 4 years of uninterrupted work of the Training Center. Hundreds of specialists have been trained.
2009 result	Additional remote offices of the company are connected using SHDSL (ZyXEL) technology. 22 users gained access to corporate services, e-mail and the Internet.
2008 result	Mounted the local area network of the company in the new building. Connected 3 sources of the Internet. Within 3 days, 34 users were moved consecutively. Services and services of the company worked without interruption.
