☎ +79109087360 📍 Smiryagina street, Novomichurinsk, Ryazan, Russia.

## SUMMARY

System administrator with over 20 years of experience in corporate IT environments in the energy sector. Extremely proficient with Ubuntu/Windows server, AWS, TrueNAS and deeply passion with enterprise-wide security management, supporting hardware with Windows OS. Helping 130 employees and networks.

👤 1981

## PROFESSIONAL EXPERIENCE

### System Administrator

🏢 'gazprom energoholding ter' (branch in the city of Novomichurinsk),

📅 2000-present 📍 Novomichurinsk, Russia

Repair and maintenance of large power plants

- I routed and managed a corporate network of over 130 computers and 59 printers all by myself in the company.
- I connected 4 Internet sources to the local network of the enterprise. This made it possible to eliminate interruptions in the operation of corporate services (0 failures in the Internet over the past 9 years).
- Connected a wireless network in 5 remote offices (35 users) of a corporate network. This increased speed by 16 times and reduced denial of service from 18 hours a month to 0.
- In 2 remote offices in difficult factory conditions, I connected a local network using a modem connection. That allowed 16 users to use the Internet and the local network.
- Coordinated with management teams to complete technical projects, including migrating over 150 devices and users.
- Managed an annual IT budget of \$25,000. Through prior procurement coordination, redundancy removal, and service sharing, I was able to save 15% of my budget.
- Created a user manual and conducted weekly user workshops, which reduced the number of support calls from 38 to 15 per month. This reduced the waiting time in customer service by 22 hours per month.

## RELEVANT CAREER OBJECTIVE

### System Administrator / Technician

## TECHNOLOGICAL SKILLS

- |                              |  |
