

SERGEI KOZLOV

Lead Linux Support & DevOps Engineer | Monitoring | Automation | Virtualization

+79-1090-873-60 | ventozamail@gmail.com | <https://www.linkedin.com/in/sergeykozlovru/>

SUMMARY

Linux System Administrator / Support Engineer with 16 years of experience supporting enterprise infrastructure in banking and energy sectors. Strong expertise in Linux administration, troubleshooting, monitoring, Bash/Python automation, virtualization, and customer support. Experienced with Ubuntu, RHEL, Debian, Zabbix, Grafana, Prometheus, Docker, and VMware in high-availability environments.

TECHNOLOGICAL SKILLS

Linux & Operating Systems:

Ubuntu, Red Hat Enterprise Linux (RHEL), Debian, Windows Server 2019

Monitoring & Observability:

Zabbix, Grafana, Prometheus, ELK Stack

Virtualization & Containers:

VMware ESXi, Hyper-V, KVM, Docker, Docker Swarm, OpenShift, Kubernetes

Networking:

TCP/IP, DNS, DHCP, VPN, SSL/TLS, Routing, Firewalls, FTP/SFTP

Automation & Scripting:

Bash, Shell Scripting, Python, Ansible

Web & Infrastructure:

Nginx, Active Directory, Exchange

Tools:

Jenkins, Git, Jira, Confluence

PROFESSIONAL EXPERIENCE

Lead DevOps / Platform Engineer | Sberbank | Dec 2024 – Present

- Administer and support large-scale Linux-based infrastructure serving mission-critical banking systems.
- Operate high-availability ClickHouse, Kafka, ZooKeeper and Apache Flink clusters across multiple environments.
- Investigate incidents, troubleshoot performance issues and resolve production alerts using Prometheus, Grafana and ELK.
- Automate operational tasks and maintenance procedures with Bash, Shell and Python scripts.
- Build and maintain CI/CD pipelines using Jenkins and Groovy.
- Support OpenShift environments across 161 hosts located in two data centers.
- Create and maintain technical documentation, operational procedures and troubleshooting guides.

System Administrator | GEH TER (Energy Trading) | Oct 2013 – Dec 2024

- Supported users and internal customers by investigating incidents, answering technical requests and documenting solutions.
- Administered Linux (Ubuntu, Debian, RHEL) and Windows Server infrastructure supporting business-critical services.
- Provided L1/L2 technical support for users and enterprise applications through service desk systems and email support.
- Diagnosed and resolved operating system, network and application issues, ensuring high service availability.
- Maintained monitoring, alerting and incident response processes using Zabbix.
- Managed VMware ESXi, Hyper-V and KVM virtualization environments.
- Configured and supported Nginx reverse proxies, DNS, DHCP, VPN and SSL/TLS certificates.
- Automated routine administrative tasks using Bash, Python and Ansible.
- Created and maintained technical documentation, runbooks, knowledge base articles and operational procedures.
- Participated in root cause analysis and continuous service improvement initiatives.

PROFESSIONAL DEVELOPMENT

- English for IT 2 — Cisco (Dec 2024)
- Network Support and Security — Cisco (Jan 2025)
- Python Essentials 2 — Cisco (Mar 2025)
- English for IT 1 — Cisco (Oct 2024)
- Python Essentials 1 — Cisco (Jan 2025)
- Enterprise Security in Practice — IBM (Sep 2024)
- Prometheus, Grafana — Stepik (Aug 2023)
- Networking Basics — Cisco (Jul 2024)
